MagTek® Introduces iDynamo™, a secure card reader for mobile payment applications using iPhone 3G, 3GS and iPod Touch.

Swindon, UK- May, 2010

MagTek Inc, a world class provider of card readers, cheque readers and scanners, PIN Pads, card issuing systems, and MagnePrint® credential authentication technology introduces iDynamo, a secure card reader for mobile payment applications using iPhone 3G, 3GS and iPod Touch.

iDynamo along with the appropriate App., turns your iPhone or iPod Touch into a highly secure mobile payment system allowing acceptance of Credit or Debit card payments anywhere.

Ideal for Merchants and mobile users, the iDynamo offers Magnesafe Security features combined with the power of iPhone and iPod Touch products. This powerful combination assures confidence and cost savings while maximising card data protection and transaction security from the moment the card is swiped all the way to authorisation. No other mobile card reader beats the protection offered by iDynamo.

The iDynamo encrypts data in the read head itself, the closest point to the magnetic stripe and offers additional security layers with immediate tokenisation of card data. This layered approach to security far exceeds the protection of encryption by itself, decreases the scope of PCI compliance, and reduces fraud.

About MagTek

Since 1972, MagTek has been a leading manufacturer of electronic devices and systems for the reliable issuance, reading, transmission and security of cards, checks, PINs and other identification documents. Leading with innovation and engineering excellence, MagTek is known for quality and dependability. Its products include secure card readers, check scanners, PIN Pads and distributed credential issuing systems. These products are used worldwide by financial institutions, retailers, hotels, law enforcement agencies and other organizations to provide secure and efficient electronic payment and identification transactions.

Today, MagTek continues to innovate with the development of a new generation of security centric products secured by MagneSafe™.

By leveraging strong encryption, secure tokenization and real time authentication, MagneSafe products enable users to assess and validate the trustworthiness of credentials used for online identification, payment processing, and other high-value electronic transactions.

MagTek is based in Seal Beach, California and has sales offices throughout the United States, Europe, and Asia, with independent distributors in over 40 countries. For more information, please visit www.magtek.com.
