

TuffSwipe

Rugged magnetic swipe reader
weatherproof and vandal-resistant magstripe reader
with USB output.

PN: 21040445

Key Features

TuffSwipe is easy to install with features that include:

- USB Keyboard or HID interface
- Vandal-resistant
- Weatherproof
- Operating Temperature: -25°C to +65°C
- IP Rating: IP67
- Electronics encapsulated in epoxy resin
- Reads lo-co and hi-co magnetic-stripe cards
- Reliable read head life in excess of 1 million passes
- Bi-directional read capability
- ISO, ANSI and AAMVA compatible
- Dimensions: 112 x 42 x 36mm

TuffSwipe - Rugged Swipe Reader

Weatherproof & Vandal Resistant USB Magnetic Card Reader

Tough

The rugged magnetic swipe reader is designed for use in the toughest conditions. Weatherproof and vandal-resistant, this tough magstripe reader is perfect for high-security access control, time and attendance, data collection and more.

Vandal-resistant

Manufactured using impact resistant UV stabilised acrylic. Using this hard wearing material means that the product is very durable and ensures that even in the harshest conditions the reader will continue to operate.

Weatherproof

An ideal choice for both indoor and outdoor use, the rugged magstripe reader electronics are embedded in epoxy resin providing protection against whatever the weather can throw at it.

Reliable

Built-in MagTek card reading technology provides extremely reliable operation with the read head rated to over 1 million passes offering the highest possible read reliability and the highest specification MTBF in the industry.

It also has bi-directional read capability and is ISO, ANSI and AAMVA compatible.

This tough magnetic card reader can be securely mounted using a stainless steel fixing plate with internal/external secure fixing.
